

# Thames Valley District School Board

Our school is committed to providing all students with a safe, caring, and inclusive learning environment that promotes respect, acceptance, and empathy.

Our staff, students, parents, and community will work together as a team to make our school safe, positive, and welcoming for everyone.

## Safe and Inclusive School Plan

### Building Positive School Culture

This year we are focusing on building positive school culture by employing restorative practices to develop relationships and resolve problems.

We are doing this to proactively help students make connections with each other, build empathy, and repair relationships when conflict has occurred.

#### Throughout the year, we will be:

1. Using the Essential Conditions for Learning resources to develop positive classroom cultures.
2. Engaging in school culture-building activities.
3. Using restorative practices questions to support students' problem solving.

#### Community/Home Connections

Ask your child about what culture building activities they are doing in their classroom.

Try using empathy-based questions to resolve problems at home with your child.

Check out this [Essential Conditions for Learning Video](#) that shows how these conditions support student achievement and well-being.
